# Easy Customization “Remastering”

# grml-live

# grml-live

- Build- & Remastering Tool
- Automatable
- FAI-based & Classes

# grml-live

# grml-live

- vi /etc/grml/...
- grml-live (-b | -u)
- => grml64\_custom-0.1.iso

# Deployment Tools

# ISO Boot Options

# ISO Boot Options

- `netconfig=server/config.tbz` download&extract
- `netscript=server/script` download&execute
- `hostname= / nodhcp`
- `debs` Install debs from "debs" folder
- `scripts=installme` Execute scripts in "installme"
- `findiso=/grml.iso` Load grml.iso from your harddisk partition(s)
- `fetch=$IP/grml.squashfs` Load grml.squashfs via HTTP
- `ssh=password`

# grml-debootstrap

# grml-debootstrap

- Wrapper around debootstrap  
grml-debootstrap \  
  --target /dev/sda3 \  
  --grub /dev/sda

# grml-debootstrap

- Wrapper around debootstrap  
grml-debootstrap \  
  --target /dev/sda3 \  
  --grub /dev/sda
- Boot using:  
debian2hd target=/dev/sda1  
grub=/dev/sda password=grml

# grml-debootstrap

- Wrapper around debootstrap  
grml-debootstrap \  
  --target /dev/sda3 \  
  --grub /dev/sda
- Boot using:  
debian2hd target=/dev/sda1  
grub=/dev/sda password=grml
- Customize: /etc/debootstrap & netconfig=
